

Portable Carrying Cases for 1/8 DIN meters - PCC Range

- ❖ **Built for you, to your specifications**
- ❖ **Internal rechargeable NiCd options**
- ❖ **Standard cases held in stock**
- ❖ **Front or rear input terminals**
- ❖ **Wide range of possibilities**
- ❖ **Fused IEC power input**
- ❖ **Strong construction**
- ❖ **Attractive styling**

Our Panel Meters will find applications in control rooms, manufacturing environments, and in the laboratory. If you require portability or a compact, desk mounting arrangement, then our Instrument Cases will prove to be an ideal choice. We hold a choice of basic formats in stock, for installations requiring one up to 12 meters. For systems requiring more meters, or the inclusion of other items, we will produce a bench mounting assembly to your specifications.

All our cases are assembled to conform with CE requirements relating to Safety and EMC, so you can be confident that you are buying a well engineered product.

If you use a particular type of connector as standard, we will build the case to incorporate that connector. If you require built-in facilities such as rotary signal selector switches, alarm outputs, battery backup, Serial Data communications etc., we hold stock of standard items, allowing us to manufacture at highly competitive prices. Please contact us to discuss your requirements, and to allow us to provide a competitive quotation for you.

LOADCELL MONITORING, RESISTANCE CHECKING, HUMIDITY / TEMPERATURE, QUADRATURE POSITION, TORQUE / RPM, TOTALISATION, VOLTAGE / CURRENT, ELAPSED TIME etc.....

Dimension guide, for various case formats :-

Model	Case Format	Width	Height	Depth
PCC1		200 mm	65 mm	185 mm
PCC2		300 mm	65 mm	185 mm
PCC4		300 mm	145 mm	220 mm
PCC6		510 mm	145 mm	220 mm
PCC12		685 mm	240 mm	280 mm
