- ★ **Simple to use** - Saves you time and money.
- ★ **Affordable** - Attractively priced and packed with useful features.
- ★ **Corrosion resistant front lens option** - Long term reliability in harsh areas
- ★ **Accurate and repeatable** - Confidently get the same quality from batch to batch

The new INT-AH from London Electronics has been designed especially for electroplaters just like you. You will be able to offer your customers increased consistency from batch to batch. And your running costs will be more closely controlled.

This is because you will have a much better measure of all those important factors which affect your plating quality. The dosing feature helps to ensure that your electrolyte is replenished automatically as needed. Optional plug-in modules mean you can order a controller to do exactly what you want. From simple display only, to full control...
