DESCRIPTION

The INT4-P is the fourth generation process meter within our popular 1/8 DIN INTUITIVE panel meter range. It utilises a modular construction technique which enables you to configure it with the exact functionality you require. This flexible approach ensures that you only pay for the features you need. Ideal for general purpose process measurements such as, flow, pressure level and humidity.

The process readout is provided by a 6 digit, 7 segment LED display which is coupled with an ultra-high resolution 20-bit A/D converter to provide your instrumentation with perfect resolution and stability. In addition the easy to use menu navigation allows you to have the indicator set up within minutes.

We offer a wide range of optional outputs including, voltage and current analogue outputs, 2 or 4 alarm relays with a wide range of configuration settings, data interface via RS232, RS422/485 + Modbus ASCII and Modbus RTU.

With backward compatibility with the existing INT2 series and the same front panel design, dimensions and connections it makes transitioning over to the INT4 easy.
